

BLUE OYSTER ENVIRONMENTAL RESTORATION

Protecting Your Coastal Paradise

Welcome to the future of coastal preservation and restoration. At Blue Oyster Environmental, we are paving the way for a new era in marine contracting, specializing in the creation of oyster reefs that redefine shoreline projects. Our innovative solutions harness nature's strength to safeguard your coastal paradise, while enhancing its beauty. Discover two transformative products designed for protecting and revitalizing your coastal habitat, promoting biodiversity, and ensuring a healthy ecosystem.

Our Signature Products

Oyster Reef Restoration: A Haven for Marine Life

Oyster Reef restoration is a new **BMP** approved by the Chesapeake Bay Program, known for its effectiveness in enhancing water quality and habitat restoration. Our Oyster Reef utilizes substrate that is pre-set with larvae as its foundation, providing a nurturing environment for oysters to thrive. These Oyster Reefs are not only environmentally friendly, but also cost-effective at removing nitrogen from the water, surpassing traditional methods.

Living Shoreline Sill: Nature's Protective Barrier

Our Living Shoreline Sill, featuring engineered substrate pre-set with oyster larvae, is a natural and elegant solution for protecting your coastal property against erosion and storm surge. Living Shorelines with oysters are not only effective, but also much more cost effective than traditional rip-rap sills.

BLUE OYSTER ENVIRONMENTAL RESTORATION

What Do Our Services Include?

-  **Design-Build Services:** Collaborate with our expert team to create a living shoreline sill or oyster reef that seamlessly integrates with your environment.
-  **Monitoring:** We provide ongoing monitoring services to ensure the continued vitality of your living shoreline or oyster reef.
-  **Customization:** Each restoration product is tailor-made to harmonize to your site conditions, guaranteeing a resilient and attractive solution.

Why Choose Our Solutions?

Choose Sustainability and Resilience.

- 1. Cost Effective Resilience:** Blue Oyster Restoration offers a cost-effective approach to achieving resiliency & habitat restoration goals. Our oyster reefs not only enhance environmental sustainability but also provide substantial economic benefits.
- 2. Nutrient Trading Growth:** We leverage the power of nutrient trading, turning oyster reefs into an innovative solution. Maryland's formal regulations and aquaculture protocols have paved the way, allowing us to establish a new oyster industry in the Chesapeake Bay.
- 3. Low Maintenance:** Once installed, our solutions require minimal maintenance, providing long-term protection and beauty.
- 4. Expertise:** Our experienced team ensures every project's success, from design to installation.
- 5. Customization:** We tailor each project to fit your needs, ensuring compatibility with your unique site conditions.
- 6. Aesthetic Appeal:** Enhance the natural beauty of your coastal area while securing its future.
